Press Release

NILES EXPANDED METALS & PLASTICS ANNOUNCES OPENING OF ANOTHER STATE-OF-THE-ART EXPANDED METAL FACILITY

Niles, OH – August 2, 2011 – Niles Expanded Metals & Plastics announces the opening of Niles Expanded Technologies (NExT), a state-of-the-art research and development and expanded mesh manufacturing facility. The company expanded its building by 7,000 square feet to accommodate the new facility and remodeled 20,000 square feet of existing warehouse space into manufacturing space. The building now occupies a total of 27,000 square feet. The expansion includes the addition of three new custom-designed production lines, slitting machines and specialized toll processing equipment for precision expanded mesh products. NExT is located at and operated by Niles Fence & Security Company LLC, 310 N. Pleasant Ave., Niles, OH.

Next is an all-new multi-faceted facility that provides precision expanded mesh materials and design solutions to customers. NExT Manufacturing produces the expanded mesh materials for medical, industrial, automotive and renewable energy markets and is ISO 9001-2008 certified. NExT Aerospace produces the expanded mesh materials for military, space and commercial aerospace markets and is the first and only producer of expanded materials in the world to be AS 9100C certified for aviation, space and defense organizations. NExT R&D develops individualized material and project design solutions for all of its industry segments.

Niles Expanded Metals & Plastics is also ISO 9001-2008 certified and manufactures a complete line of standard and flattened expanded metal, grating and security fencing products for domestic and export use. Most of the expanded metal products are available in a wide range of ductile material, including carbon steel, stainless steel, aluminum, nickel alloys, red metals, titanium, plastic, zinc, precious metals, copper, brass, bronze and most ferrous and non-ferrous metals. The company offers a large selection of stocked inventory or custom designs and sizes. Value added services such as shearing, custom fabrication and the application of special finishes are available. Niles Expanded Metals & Plastics carries expanded materials that can be used to replace most perforated, woven/welded wire or any other open area materials while enhancing appearance with various architectural designs. The company was founded in 1959 and is under the guidance of William E. Phillips, board chair and CEO, and William E. Phillips Jr., president and COO.
