NILES EXPANDED METALS & PLASTICS LAUNCHES NILES FENCE & SECURITY PRODUCTS, LLC

Niles, Ohio. -- March 16, 2006 -- Niles Expanded Metals & Plastics, which operates their plant at 310 Pleasant Ave., launches Niles Fence & Security Products, LLC. This new company will manufacture expanded metal security fence systems and accessories that are designed for the Rail Industry, Utilities, Schools, Retail, Local Authority, Super Security Systems for Airports, Prisons, etc. This comprehensive range of systems allows a customer to tailor the fencing to suit their needs, whether they are replacing an existing fence, or opting for a brand new one. The expanded metal fencing is hot dip galvanized with the option of polyester powder coating which means that the fencing can either blend into the background or be turned into an eye-catching feature.

There are four types of expanded metal Security Fence Systems now offered; Diamond Fencing, Fastrack Fencing, Channel Fencing and Electra Fencing. Diamond Fencing creates a substantially more secure alternative to chainlink and cost effective solution to palisade. It is suitable for public safety and security. Fastrack Fencing has been developed in conjunction with the rail industry to help reduce trespass and vandalism on tracksides. Channel Fencing has been developed to provide perimeter security solutions for the water industry. Electra Fencing has been designed for the electric industry, particularly sub-station protection, where boundary security is of paramount importance.

Niles Expanded Metals & Plastics is an ISO 9001-2000 Certified company who manufactures a complete line of expanded metal and grating products for domestic and export use. The company was founded in 1959 and is under the guidance of William E. Phillips, Chairman of the Board & CEO, William E. Phillips, Jr., President and Clarence N. Hoye, Executive Vice President & COO. For more information log-on to their web site www.nilesexpandedmetals.com or www.nilesfence.com or call 800-321-2727.
